

JERRY'S NUGGET CASINO

Your Kind of Place for higher payouts when you play craps!

As you can see in the picture Jerry's payouts are 34 to 1 on the two sides and 175 to 1 in the middle.

Other casinos have adjusted their pay tables to 30 to 1 on the sides and 150 to 1 in the middle.

This results in a higher house edge on the bet and is significantly worse for the player.

Jerry's Nugget is currently the only one in the State of Nevada that has the higher pay table.

Players at Jerry's get paid out 13% and 17% more every time they win.
